COURSE DESCRIPTIONS

CFC

This course prepares HVAC-R technicians with the knowledge needed to respond professionally to current and future environmental challenges. Refrigerant Transition Recovery Certification Program, EPA approved program covering Type I, II and III appliance testing. Due to agency requirements this course can not be discounted. CFC Certification course fee \$99.

Changes to the 2011 Ohio Plumbing Code

This course will focus on the changes that were made to the 2011 plumbing code. A basic understanding of the 2007 code and a copy of the 2011 Ohio Plumbing code is suggested to gain the maximum benefit from this course.

Improve Tech Communication to Increase Leads

Attention Service Technicians! Learn the importance of talking with your customer, learning about problems they may not know even exists and how to turn that around to generate profitable leads.

Installing and Servicing Honeywell RedLink

Can't pull wires from the thermostat location to the new HVAC system? Want to retrofit a zoning system and don't have access to pull wires to the second floor? Honeywell Redlink wireless control system is the answer. The different control choices their installation and service will be covered.

NATE

This course will help prepare a NATE candidate for the exam by reviewing the Refrigerant Pressure Temperature Chart, super heat charging, charging by sub cooling, basic electrical circuits, Ohms law, single and 3 phase motors, low voltage wiring, and power circuits for compressors.

The Electric Side of Heat Pump Operation

What needs to happen electrically for a Heat Pump to heat? To cool? To clear the frost off the outdoor coil? How can a thermostat control a heat pump and a fossil fuel furnace at the same time? These questions and more will be answered in this course. A basic understanding of the operation of a split system air conditioner is suggested before attending this course.

Troubleshooting Hydronic Heating Systems

This class is focused on the proper diagnosis of a hydronic heating system, verifying fluid flow, air problems, pressure problems, expansion tank problems and controls unique to hydronic heating systems are a few of the topics to be covered. A basic understanding of hydronic heating systems would be helpful in gaining maximum benefit from this course.

Troubleshooting Luxaire Simplicity 1A and Lite Controls

This course will cover the operation and troubleshooting of the Luxaire Simplicity 1A and Lite controls. These controls are used on 3-15 Ton Gas/Electric and Electric/Electric package units. The sequence of operation, safety control inputs and operating control inputs will be covered. The error codes and proper addressing of the controls in a network will also be discussed.

Understanding Wiring Methods and Materials, Articles 240 thru 490

In this course we will learn how to interpret the National Electric Code for your specific work projects. With this training you will learn how to use the code book as a tool to understand that you are doing the right thing because you have learned how to interpret the code.
